Portfolio (website)

SUMMARY

Web Developer and Web Scraping Specialist with 5+ years of freelance experience serving 90+ clients globally through Fiverr and Upwork. Recently expanded expertise to full-stack web development with Django and React. Proven track record of building custom applications, automation pipelines, and secure server deployments. Strong problem-solving skills with ability to understand, modify, and enhance existing codebases.

SKILLS

Category	Technologies
Backend	Django, REST Framework, Python, SQL
Frontend	React.js, JavaScript
Web Scraping	Python, Browser Automation, API Integration, Data Cleaning
Desktop Apps	PyQt5
DevOps	Server Deployment, CronJob, Tailscale, Docker

WORK EXPERIENCE

Freelance Developer | Fiverr & Upwork | 2020 – Present

Served 90+ Clients across Web Scraping and Development Projects

- Developed custom web scraping solutions extracting millions of records from platforms like Cookpad (2M+ recipes), Amazon (filtered book data), and LoopNet (complete real estate listings twice)
- Built PyQt5 desktop application with real-time spreadsheet display, multi-site scraping, and subscription-based access control
- Deployed automated scraping pipelines on servers with CronJob scheduling
- Transitioned to web development building Django/React applications

PROJECTS

Password Manager Customization

Django Web App | Deployed Oct 2025 – Present

- Modified open-source Django password manager app
- Added new fields to database models with custom encryption
- Deployed on local server with Tailscale for secure remote access

Full-Stack Web App (In Progress)

- Building Django backend with CRUD operations
- Developing React frontend connected via REST Framework
